

## Submit an Excise Tax Report by File Upload: Winery Permit (G)

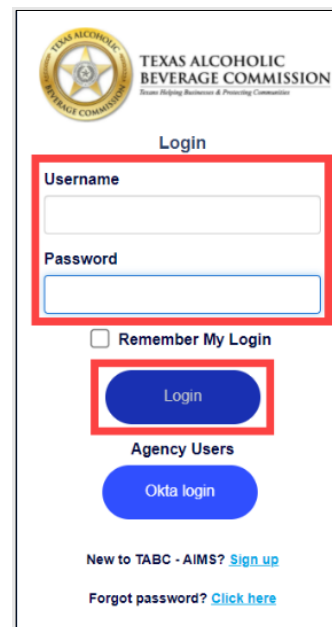

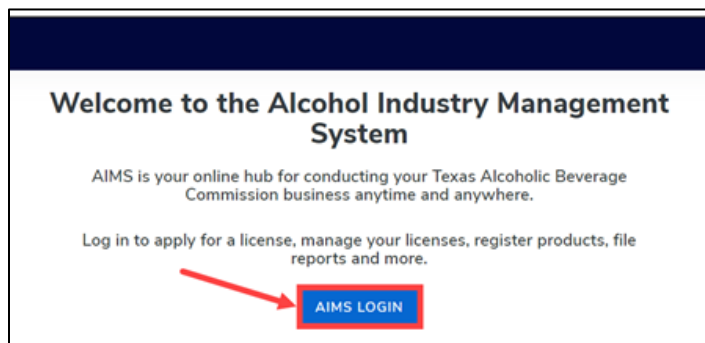

This guide provides the steps to submit an excise tax report for a business that holds the Winery Permit (G). Each permit holder must submit the following schedules:

- **Schedule 1** reports both manufacturing and retail and consumer sales. You should include the total amount of alcohol manufactured (i.e., bottled, canned, or kegged) for the month, in gallons. Businesses eligible to sell to retailers and consumers for on- or off-premises consumption must also report the gallonage sold for each category in the reporting month.
- **Schedule 2** reports incoming alcohol (i.e., product received) and exemptions, such as sales to distributors or alcohol exported out of the state.
- **Schedule 3** reports bulk wine received.

You must file your report between the 1st and 15th of the month, covering activity in the previous month.

### 1. Log in to AIMS:

- Enter [tabc.texas.gov/aims-login](http://tabc.texas.gov/aims-login) in Google Chrome or Microsoft Edge on your device.
- Click **AIMS LOGIN** when you're on the AIMS landing page.
- Enter **Username** and **Password**. Click the **Login** button.

2. If you have several business entities, click the one you want to access. The business entity's AIMS dashboard will appear.

Click the **File excise tax** tile.

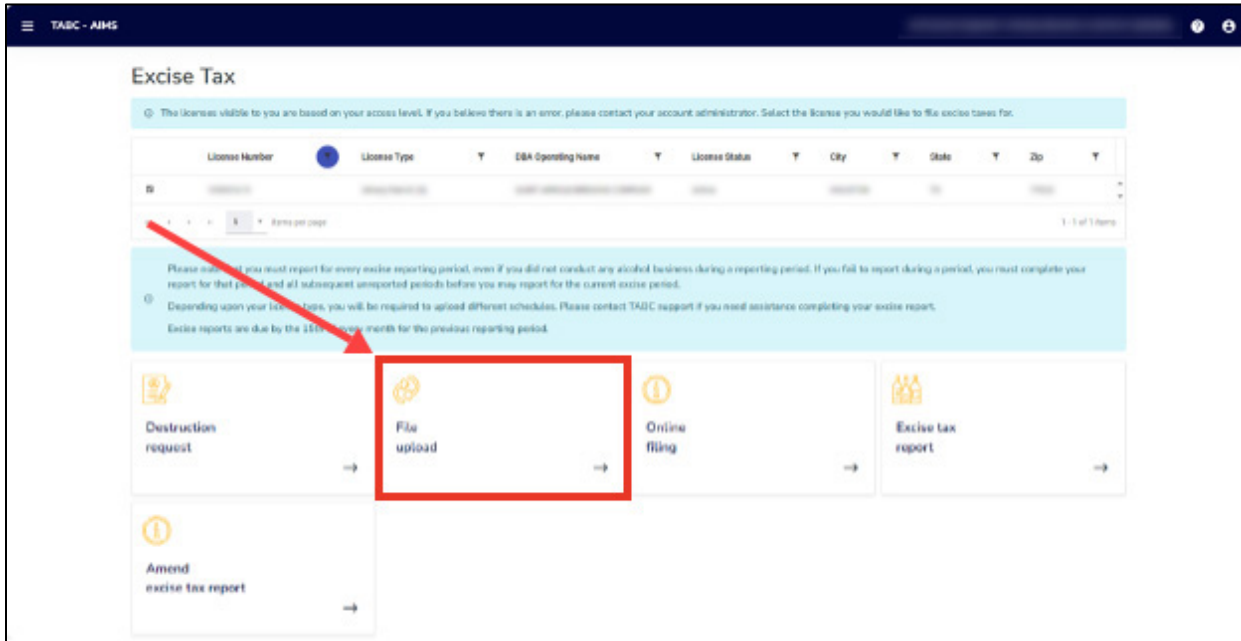

**i** If **no business** was conducted during the reporting period, see Step 3 in the [Zero Report User Guide](#).

3. Select the **checkbox** next to the permit for which you need to submit excise taxes.

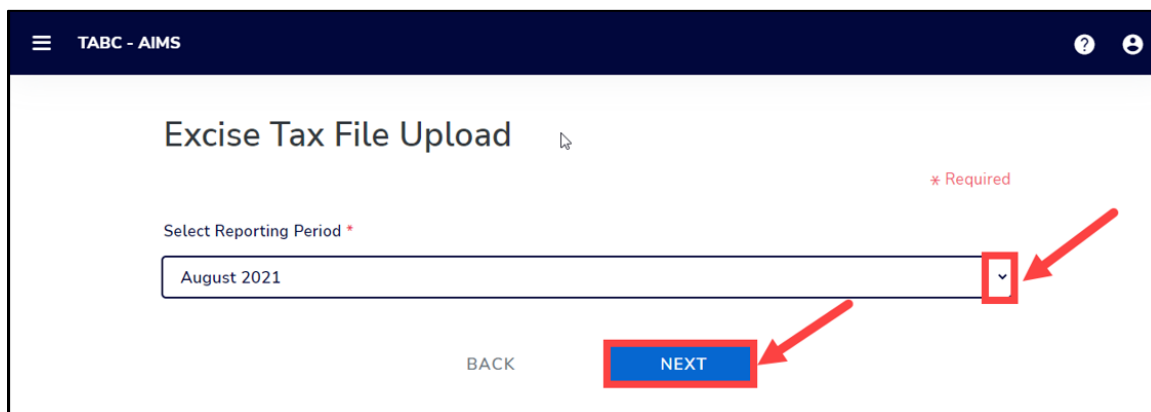

4. Click the **File upload** tile.

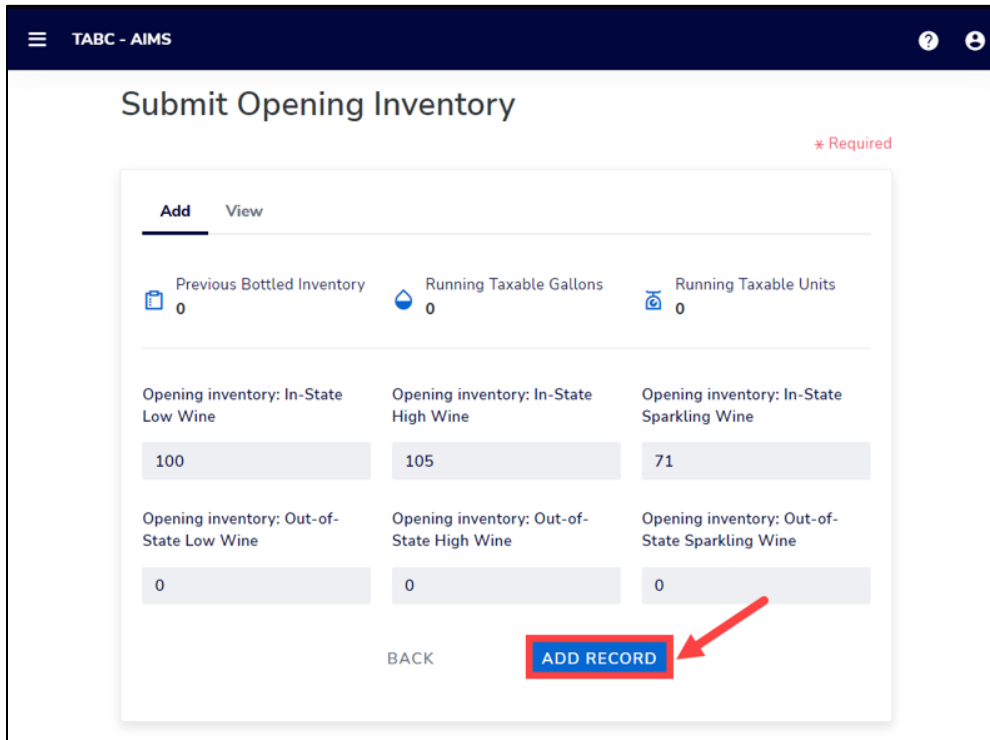

5. **Select Reporting Period** from the dropdown list. You'll typically be selecting the previous month as the reporting period.

Click the **Next** button.

6. **Skip to Step 9 if you have submitted an excise tax report in AIMS before.** If this is your first time submitting in AIMS, you must enter an opening inventory. The opening inventory is equal to the total closing inventory from the previous reporting period. Enter opening inventory for each beverage category and click the **Add Record** button.

**Important note:** You won't have to enter Opening Inventory amounts for subsequent report filings.

- Download all the required schedules. You'll use the files on this page to enter the necessary information.

Click each file name to download the file onto your computer. AIMS will automatically display the required schedules based on the permit type.

**Important notes:** You must ensure all data entered matches the format provided in these files. Do not change the column headings when saving a file.

Once you've downloaded the files, click the **Next** button.

- Complete the required schedules. See detailed instructions for each schedule. Fill in each cell of the schedule spreadsheet with the information in these instructions.

### How to Complete Schedule 1

The following fields are required:

	A	B	C	D
1	Transaction	AlcoholType	Quantity	SaleType
2				

**Transaction (Column A):** Type either “Manufacture” or “Direct Sales” into each cell. Inventory reported as Manufacture should be reported on a separate row from Direct Sales.

- **Manufacture** — Enter if the alcoholic beverage inventory is manufactured (e.g., winery reporting gallons of wine produced). You can't select out-of-state alcohol types (OOSLW, OOSHW and OOSSW) as manufactured. If you input this option, leave SaleType (Column D) blank for that row.
- **Direct Sales** — Enter if the business made sales to retailers, sales off-premises and/or sales on-premises during the reporting period. If you select direct sales, you must enter an option for SaleType (Column D). If you input Direct Sales, you must enter an option for SaleType (Column D).

**AlcoholType (Column B):** the alcohol type manufactured and sold to retailers for on- or off-premises consumption. Choose from the options listed under Alcohol Type below and type them exactly as they appear:

Alcohol Type	Description

TXSW	Texas sparkling wine (gallons)
OOSLW	Out-of-state low wine — 14% ABV and lower (gallons)
OOSHW	Out-of-state high wine — more than 14% ABV (gallons)

- ONPREMISE — sold for on-premises consumption.

**Example:** An in-state winery that manufactured 1,000.5 gallons of low wine, and sold on-premises 10 gallons of the low wine it manufactured, would report these as such:

	A	B	C	D
1	Transaction	AlcoholType	Quantity	SaleType
2	Manufacture	TXLW	1000.5
